MLRITM's Vision & Mission

Vision

To be a globally recognized institution that fosters innovation, excellence, and leadership in education, research, and technology development, empowering students to create sustainable solutions for the advancement of society.

Mission

- To foster a transformative learning environment that empowers students to excel in engineering, innovation, and leadership.
- To produce skilled, ethical, and socially responsible engineers who contribute to sustainable technological advancements and address global challenges
- To Shape future leaders through cutting-edge research, industry collaboration and community engagement.

Quality Policy

- Ensure excellence in education through innovative teaching and continuous improvement.
- Promote ethical, skilled, and employable graduates who drive sustainable technologies
- Encourage research, industry collaboration, and community engagement for societal benefit.

Message from the Director

NBA Tier 1 Accreditation for CSE, ECE, EEE, MECH CE

A Global Milestone for MLRITM

It gives me immense pride and joy to announce that MLR Institute of Technology and Management (MLRITM) has secured NBA Tier1 accreditation for its engineering programs. This achievement is a testament to our commitment to delivering world-class technical education through innovative teaching, robust academic processes, and student-centric practices. The rigorous evaluation under Tier1—aligned with Washington Accord standards—validates the quality and effectiveness of our Outcome Based Education approach.

This accreditation elevates our institution to an international platform, ensuring our graduates receive global recognition for their degrees. It significantly enhances opportunities for our students in higher education and employment abroad, while also reaffirming the trust that industry and academia place in our programs. Beyond numbers and rankings, this is about shaping confident, competent graduates who can thrive anywhere in the world.

While we celebrate this milestone, we recognize it as a beginning rather than an endpoint. MLRITM remains dedicated to continuous improvement—expanding research, deepening industry collaborations, and nurturing holistic development among our students. Together, let us move forward, inspired by this achievement to set new benchmarks and continue scaling new heights

Prof. Dr. P. Shridhar
Director,
MLRITM, Hyderabad

MESSAGE FROM THE PRINCIPAL

Seizing Opportunities, Shaping Success

Specialized coaching and certifications to empower learning, skills, and career excellence in the new academic year

A new academic year is a fresh chapter—one filled with possibilities, challenges, and milestones waiting to be achieved. As we welcome our students back to campus, I am reminded that education is not just about completing a syllabus, but about building the confidence, competence, and character to face the future. This year, let us all commit ourselves to learning with purpose, working with passion, and leading with integrity.

To empower our students in their journey, we are introducing specialized GATE coaching and professional certification programs that go beyond conventional learning. These initiatives are not mere add-ons—they are strategic pathways to reinforce academic knowledge, develop real-world skills, and sharpen competitive abilities. Whether aiming for top ranks in national-level exams or preparing for global career opportunities, such focused training will help our students turn aspirations into achievements.

I urge each of you to seize these opportunities with determination. Your success will be the result of consistent effort, a curious mind, and the courage to go beyond your comfort zone. With the guidance of our faculty, the encouragement of your peers, and your own perseverance, I believe this year can become a turning point—one where you move closer to your learning goals and career dreams. Together, let us make this journey remarkable.

Prof. Dr. K. Murali Prasad
Principal,
MLRITM, Hyderabad

EDITORIAL

NBA Tier 1 Accreditation for CSE, ECE, EEE, MECH CE

A New Era of Excellence

IThe conferment of NBA Tier-1 accreditation on MLRITM marks a defining moment in our pursuit of academic distinction. Unlike Tier-2 accreditation, which is nationally recognized, Tier-1 aligns our programs with the international standards set by the Washington Accord, underscoring our commitment to delivering education of global relevance. It reflects our systematic focus on quality—from curriculum design to student outcomes and faculty development.

For our students, this milestone unlocks broader horizons. Degrees awarded under Tier-1 accredited programs carry global credibility, facilitating smoother admission into postgraduate studies abroad and enhancing employability with multinational companies. It ensures that what students learn here is not only current and industry-relevant but also globally benchmarked, equipping them for success anywhere in the world.

For the institute, NBA Tier-1 accreditation strengthens our culture of excellence and accountability. It encourages deeper engagement with industry, drives curriculum innovation, and propels us toward becoming a center for research and development. At MLRITM, this accreditation is more than an honor—it is a promise to keep striving, keep innovating, and keep leading as we scale new heights in technical education.

GUEST LECTURE ON INFRASTRUCTURAL DESIGN IN COMMERCIAL COMPLEXES

The Department of Civil Engineering has arranged a Guest Lecture on Infrastructural Design In Commercial Complexes, conducted on 19-06-2025 delivered by Dr. P. Muralidhar, Sr. Associate Professor, National Institute of Construction Management and Research, Hyderabad.

The guest lecture on "Infrastructural Design in Commercial Complexes" was organized to provide students with an insightful understanding of the complexities involved in designing infrastructures that meet the functional and aesthetic requirements of commercial spaces. The lecture focused on various design principles, challenges, and considerations that play a crucial role in creating effective and efficient commercial environments. Around 60 students attended this lecture.

The main objectives of the guest lecture are:

To highlight the significance of infrastructural design in commercial buildings.

To explain the latest trends and technologies used in the design of commercial spaces.

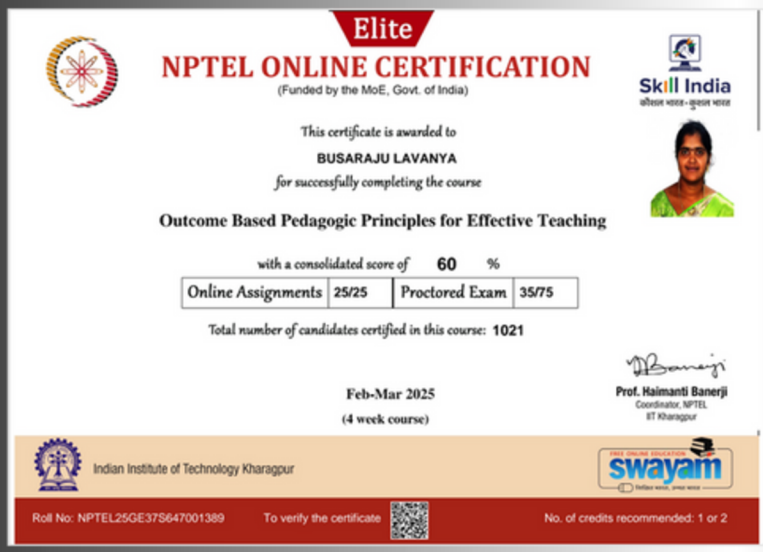

To explore real-life case studies and design strategies for commercial complexes.

To discuss the challenges faced by architects and engineers in commercial infrastructural design.

The speaker shared several examples of successful commercial complex projects where infrastructural design played a key role in the project's success. These case studies helped illustrate how design principles are applied in practice, focusing on innovative solutions for space optimization, sustainability, and future scalability.

GUEST LECTURE COVERING OPPORTUNITIES THROUGH GATE & PSUs. (07-04-2025)

The Department of Civil Engineering organized a Guest Lecture with Prof. Siva Prasad, from ACE Academy, Hyderabad, covering the opportunities through GATE and PSUs on, 7th April, 2025 to sensitize the students at early stage so that they start their preparation right from second year.

Our Guest, Prof. D. Shiva Sai, explained the importance of GATE and PSU exams, method for preparation, important topics on which more questions are asked and books required for preparation, the importance of GATE scores for pursuing higher studies and for acquiring placement in core industries.

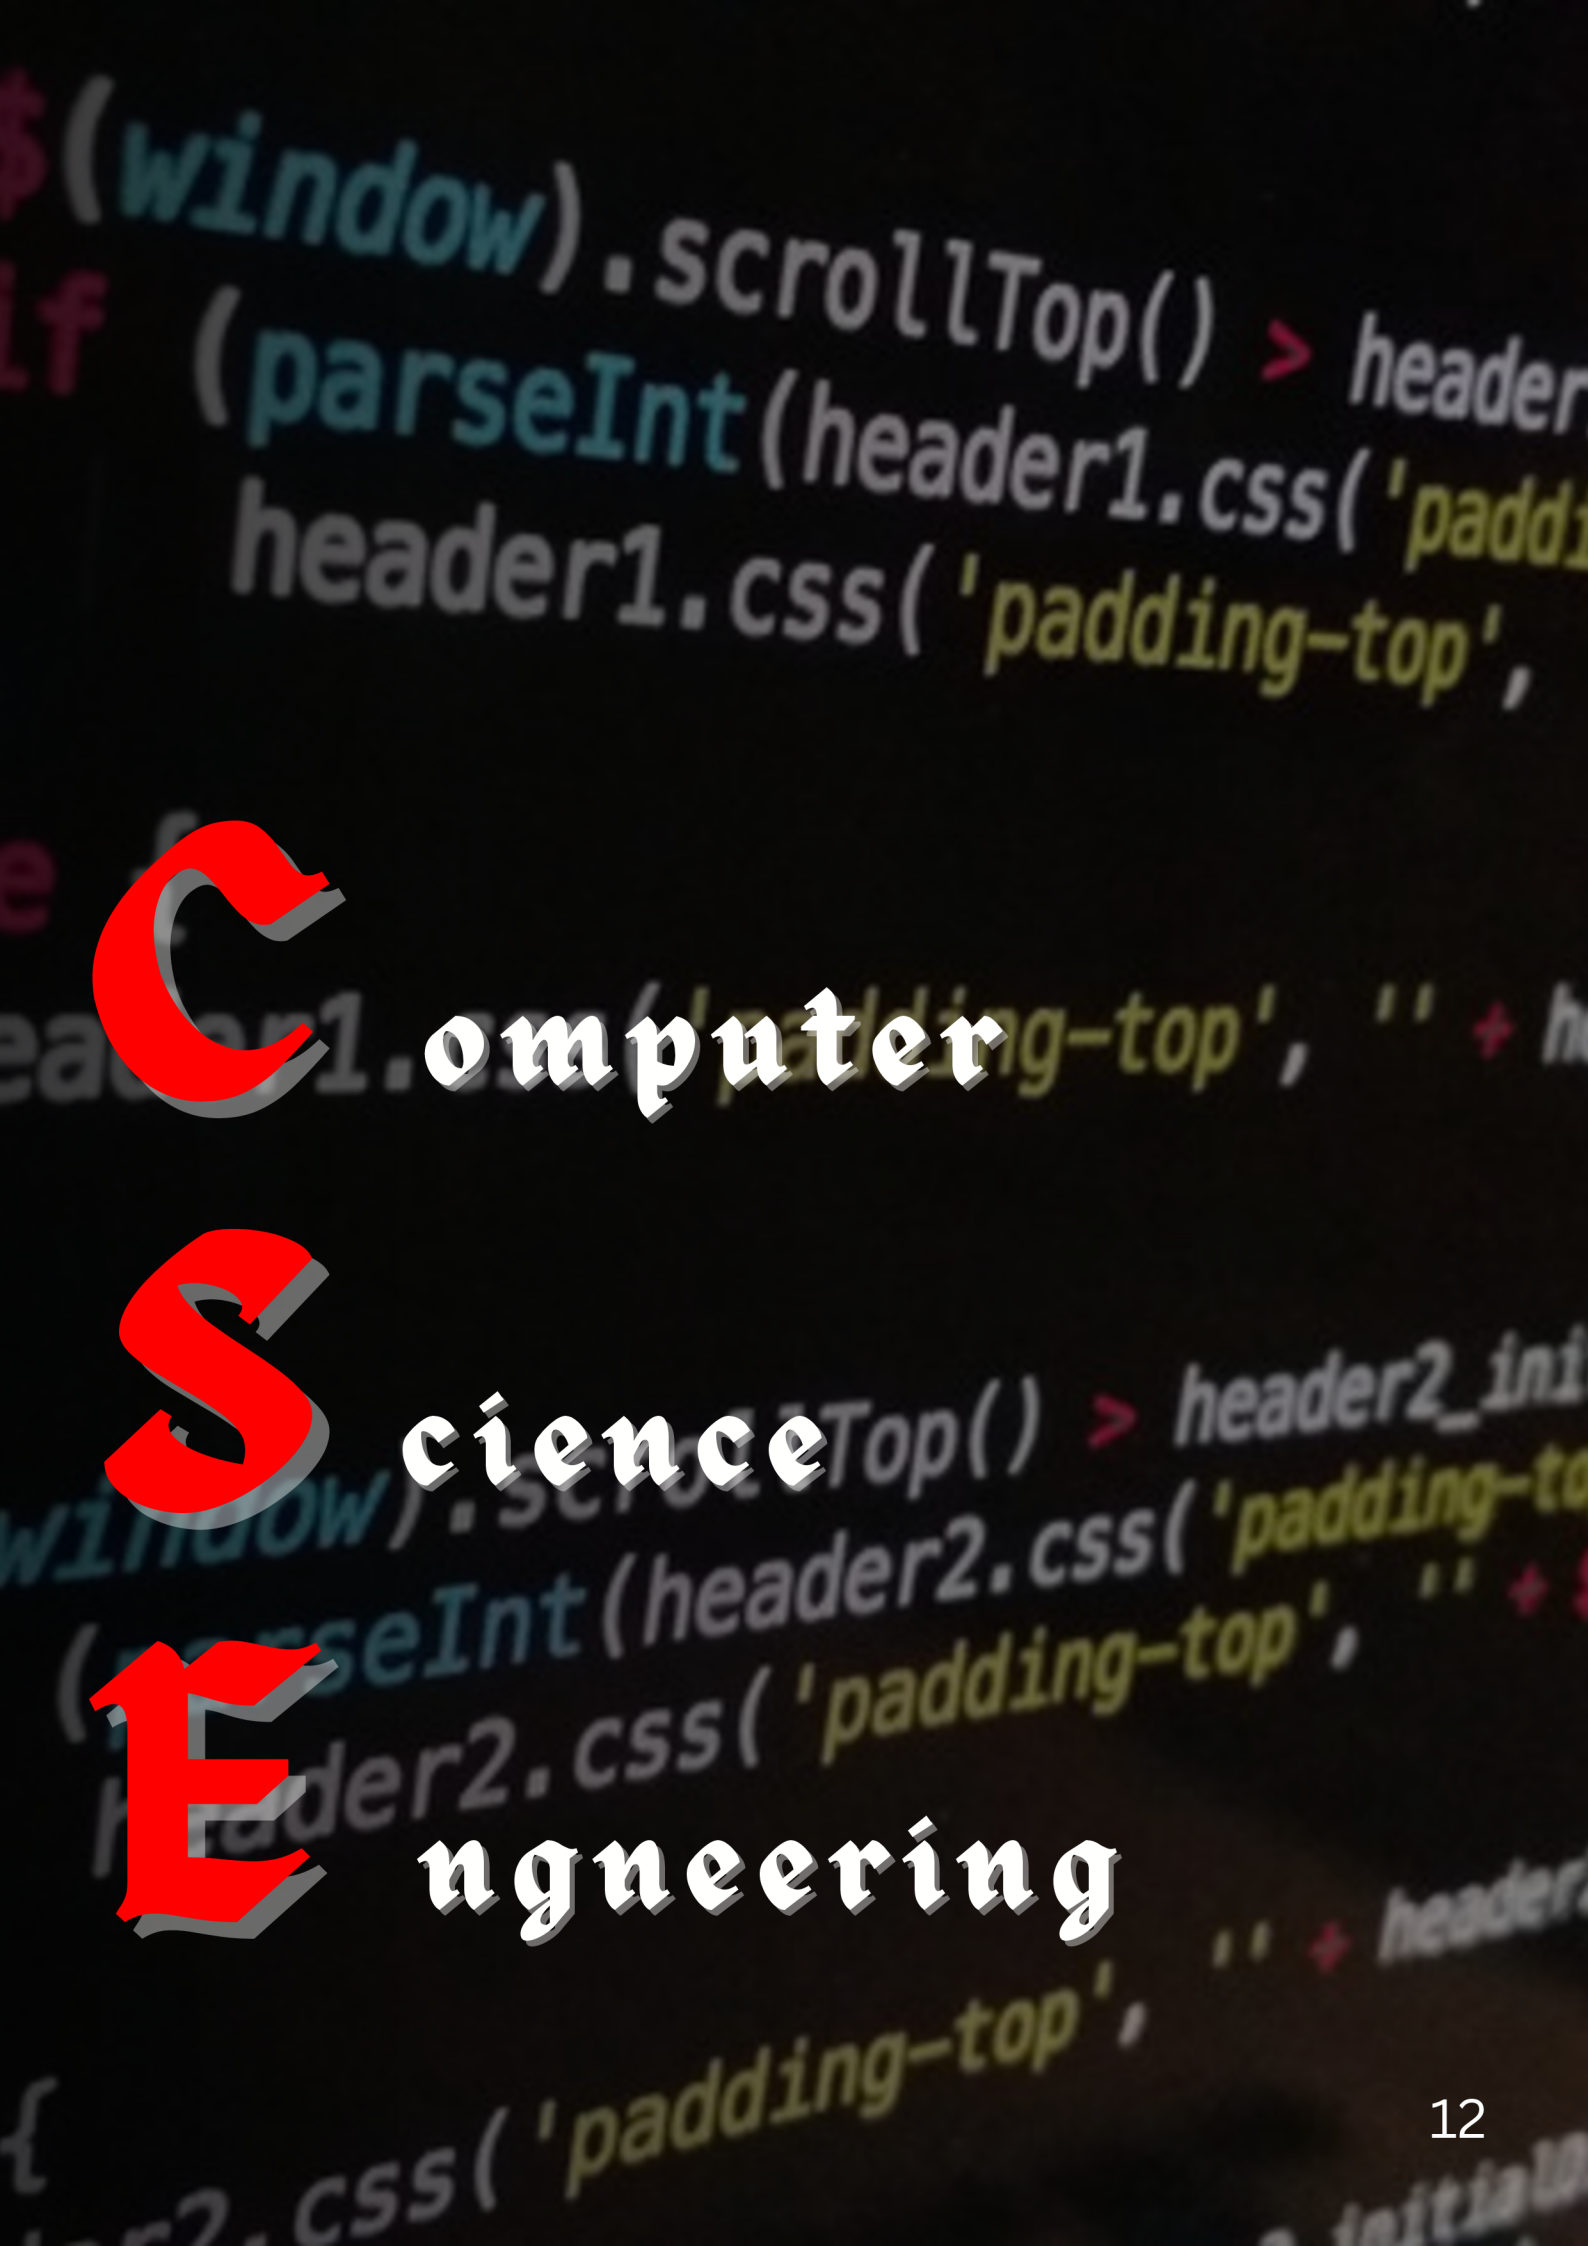

Qualifying GATE & PSU examination with excellent score not only offers chance to get admission to M.Tech in premier institutes like IITs and NITs but also offers job openings in public sector companies. The students felt that the session was really useful and informative for pursuing higher studies and also very helpful for their career guidance. Around 40 students from all the four years of Civil Engineering Department attended the lecture which was arranged by, Dr. K. Murali and Dr. M. Saravanan.

Computer
Science
Engneering

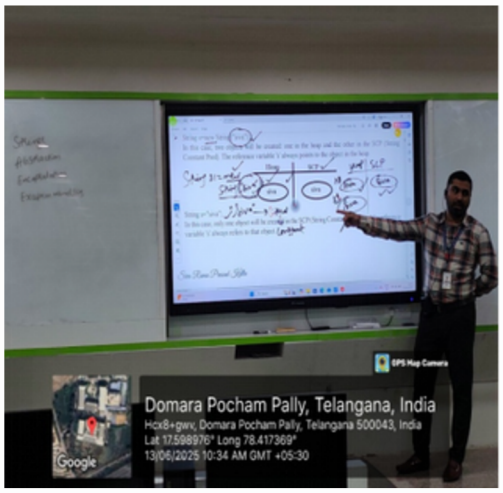

CSE

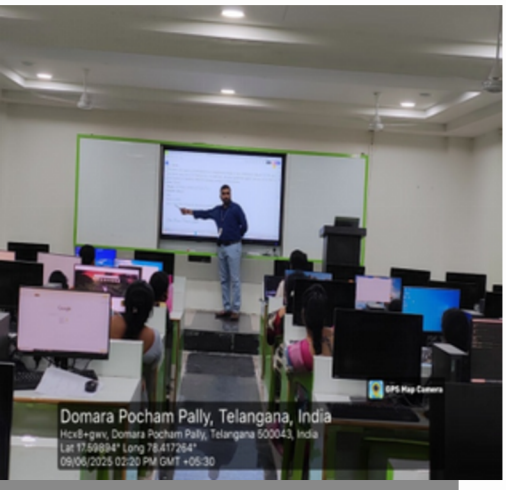

JAVA

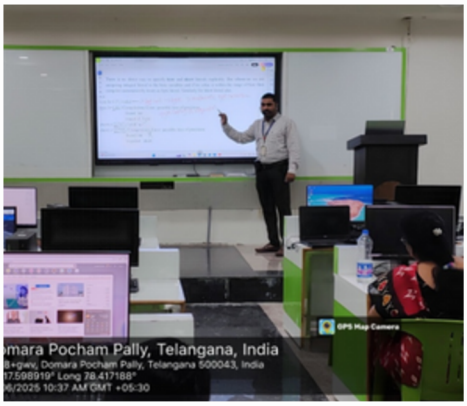

Programming

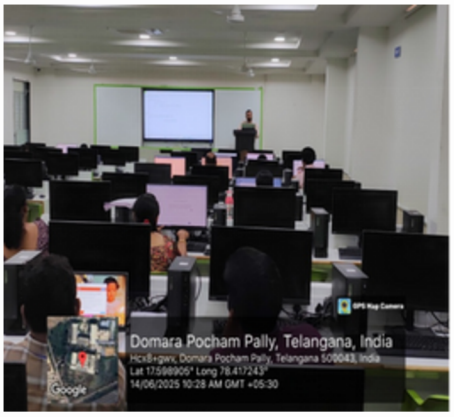

"The Departments of Computer Science and Engineering successfully conducted the Faculty Development Program titled "JAVA PROGRAMMING" scheduled from June 9th to June 14, 2025, at MG 010, offering faculty members comprehensive practical training and depth knowledge of core Java programming concepts.

The objective of this Faculty Development Program was to empower faculty members with in-depth knowledge of core Java programming concepts. The program emphasized hands-on practice and conceptual clarity in object-oriented programming, control structures, exception handling, multithreading, and Java development tools.

“RUST”

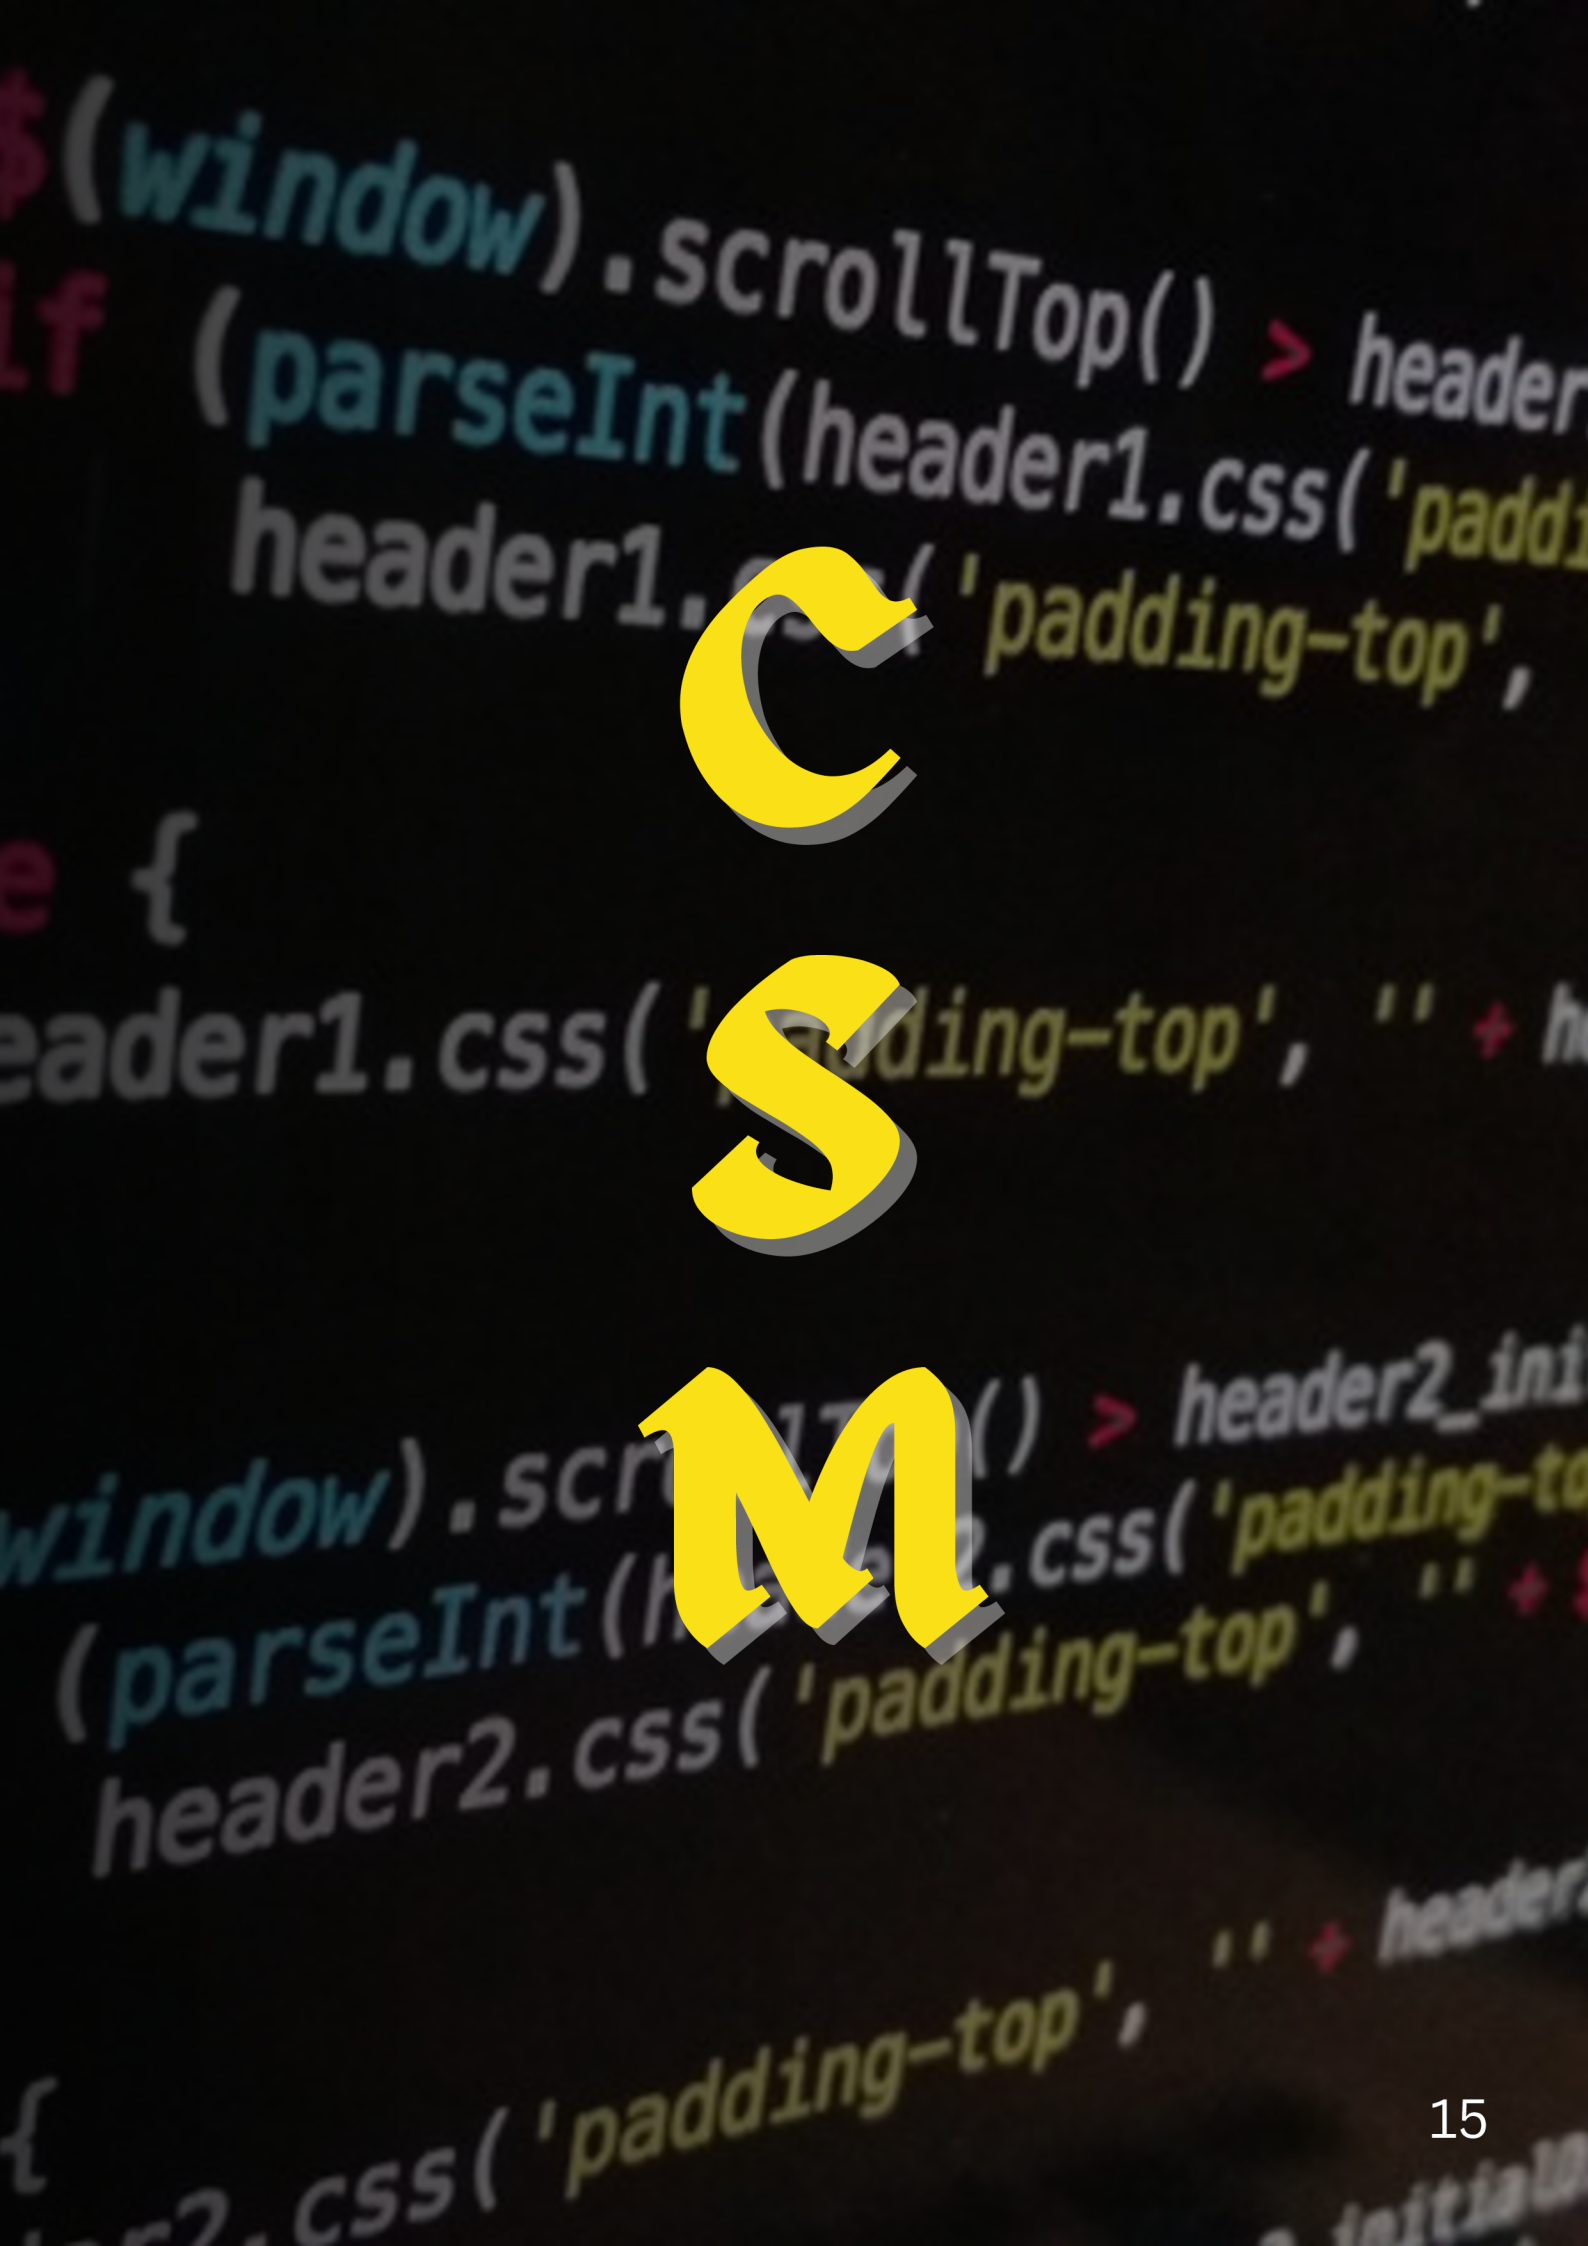

CSE

The Departments of Computer Science and Engineering successfully conducted the Faculty Development Program on “RUST” Mr. RAJESH KUMAR, an expert in systems programming and open-source technologies, will deliver an insightful session on the Rust programming language, scheduled from June 23rd to June 28th, 2025, at MG 010, offering faculty members through the fundamentals and advanced features of the Rust programming language. Faculty will gain insights into Rust’s memory safety model, ownership and borrowing concepts, error handling, concurrency, and system-level programming. It will also explore Rust’s applications in embedded systems, web development, and performance-critical software, empowering educators to integrate modern, safe programming practices into their teaching and research

The main objective of learning Rust is to enable safe, fast, and concurrent system-level programming. It aims to equip learners with knowledge of Rust’s unique features like ownership, borrowing, and memory safety, allowing them to write efficient and reliable code without a garbage collector. It also helps in understanding how Rust can be applied in areas like embedded systems, web development, and performance-critical applicaions.

CSM

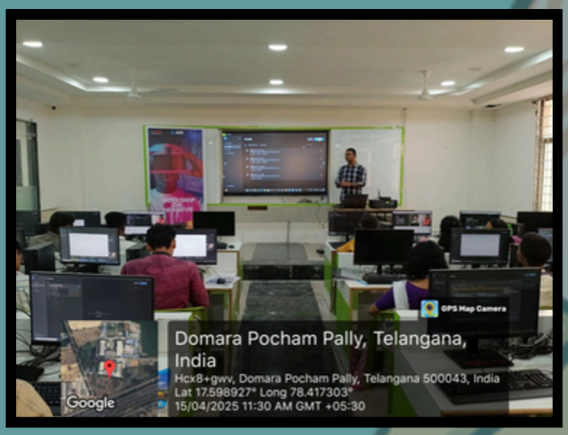

AR VR WORKSHOP

CSM

The Departments of Computer Science and Engineering (CSE) and Civil Engineering at MLRITM have come together to organize a week-long interdisciplinary workshop on Augmented Reality (AR) and Virtual Reality (VR), scheduled from April 14 to April 19, 2025, in Room MG 018. This initiative aims to introduce students to the evolving landscape of immersive technologies and their application across domains.

Throughout the workshop, participants will explore the principles behind AR and VR, get hands-on experience with industry-standard tools, and work on mini-projects that simulate real-world challenges.

From creating virtual spaces to overlaying digital content in the real world, the sessions will cover both the creative and technical aspects of these technologies.

This workshop is particularly valuable for students aspiring to enter fields such as architecture, civil engineering, game design, education tech, and simulation modeling. It emphasizes practical learning, innovation, and collaborative problem-solving between students of different branches.

This collaboration with Intel® Unnati reflects MLRITM's commitment to bringing global industry standards into academic practice. It created a platform where students could confidently transition from learners to innovators, equipped with the tools and mindset needed to thrive in tomorrow's tech driven world.

NO-SQL

CSM

Hands on learning

The Departments of Computer Science and Engineering (AIML) successfully conducted the Faculty Development Program titled "No SQL - Hands-On Learning" scheduled from June 16 to June 20, 2025, at MG 010, offering faculty members comprehensive practical training and insights into No SQL databases to advance their expertise in contemporary data management technologies.

The primary objective of the Faculty Development Program was to enhance faculty members' knowledge and practical skills in No SQL databases, with a specific focus on Mongo DB. The program aimed at bridging the gap between academic content and industrial practices through hands-on sessions.

Based on the syllabus titled "24X0597: No SQL Data Bases (Mongo DB)", the following modules were covered:

Module I: Introduction to No SQL and Mongo DB, Data types, installation, and modeling

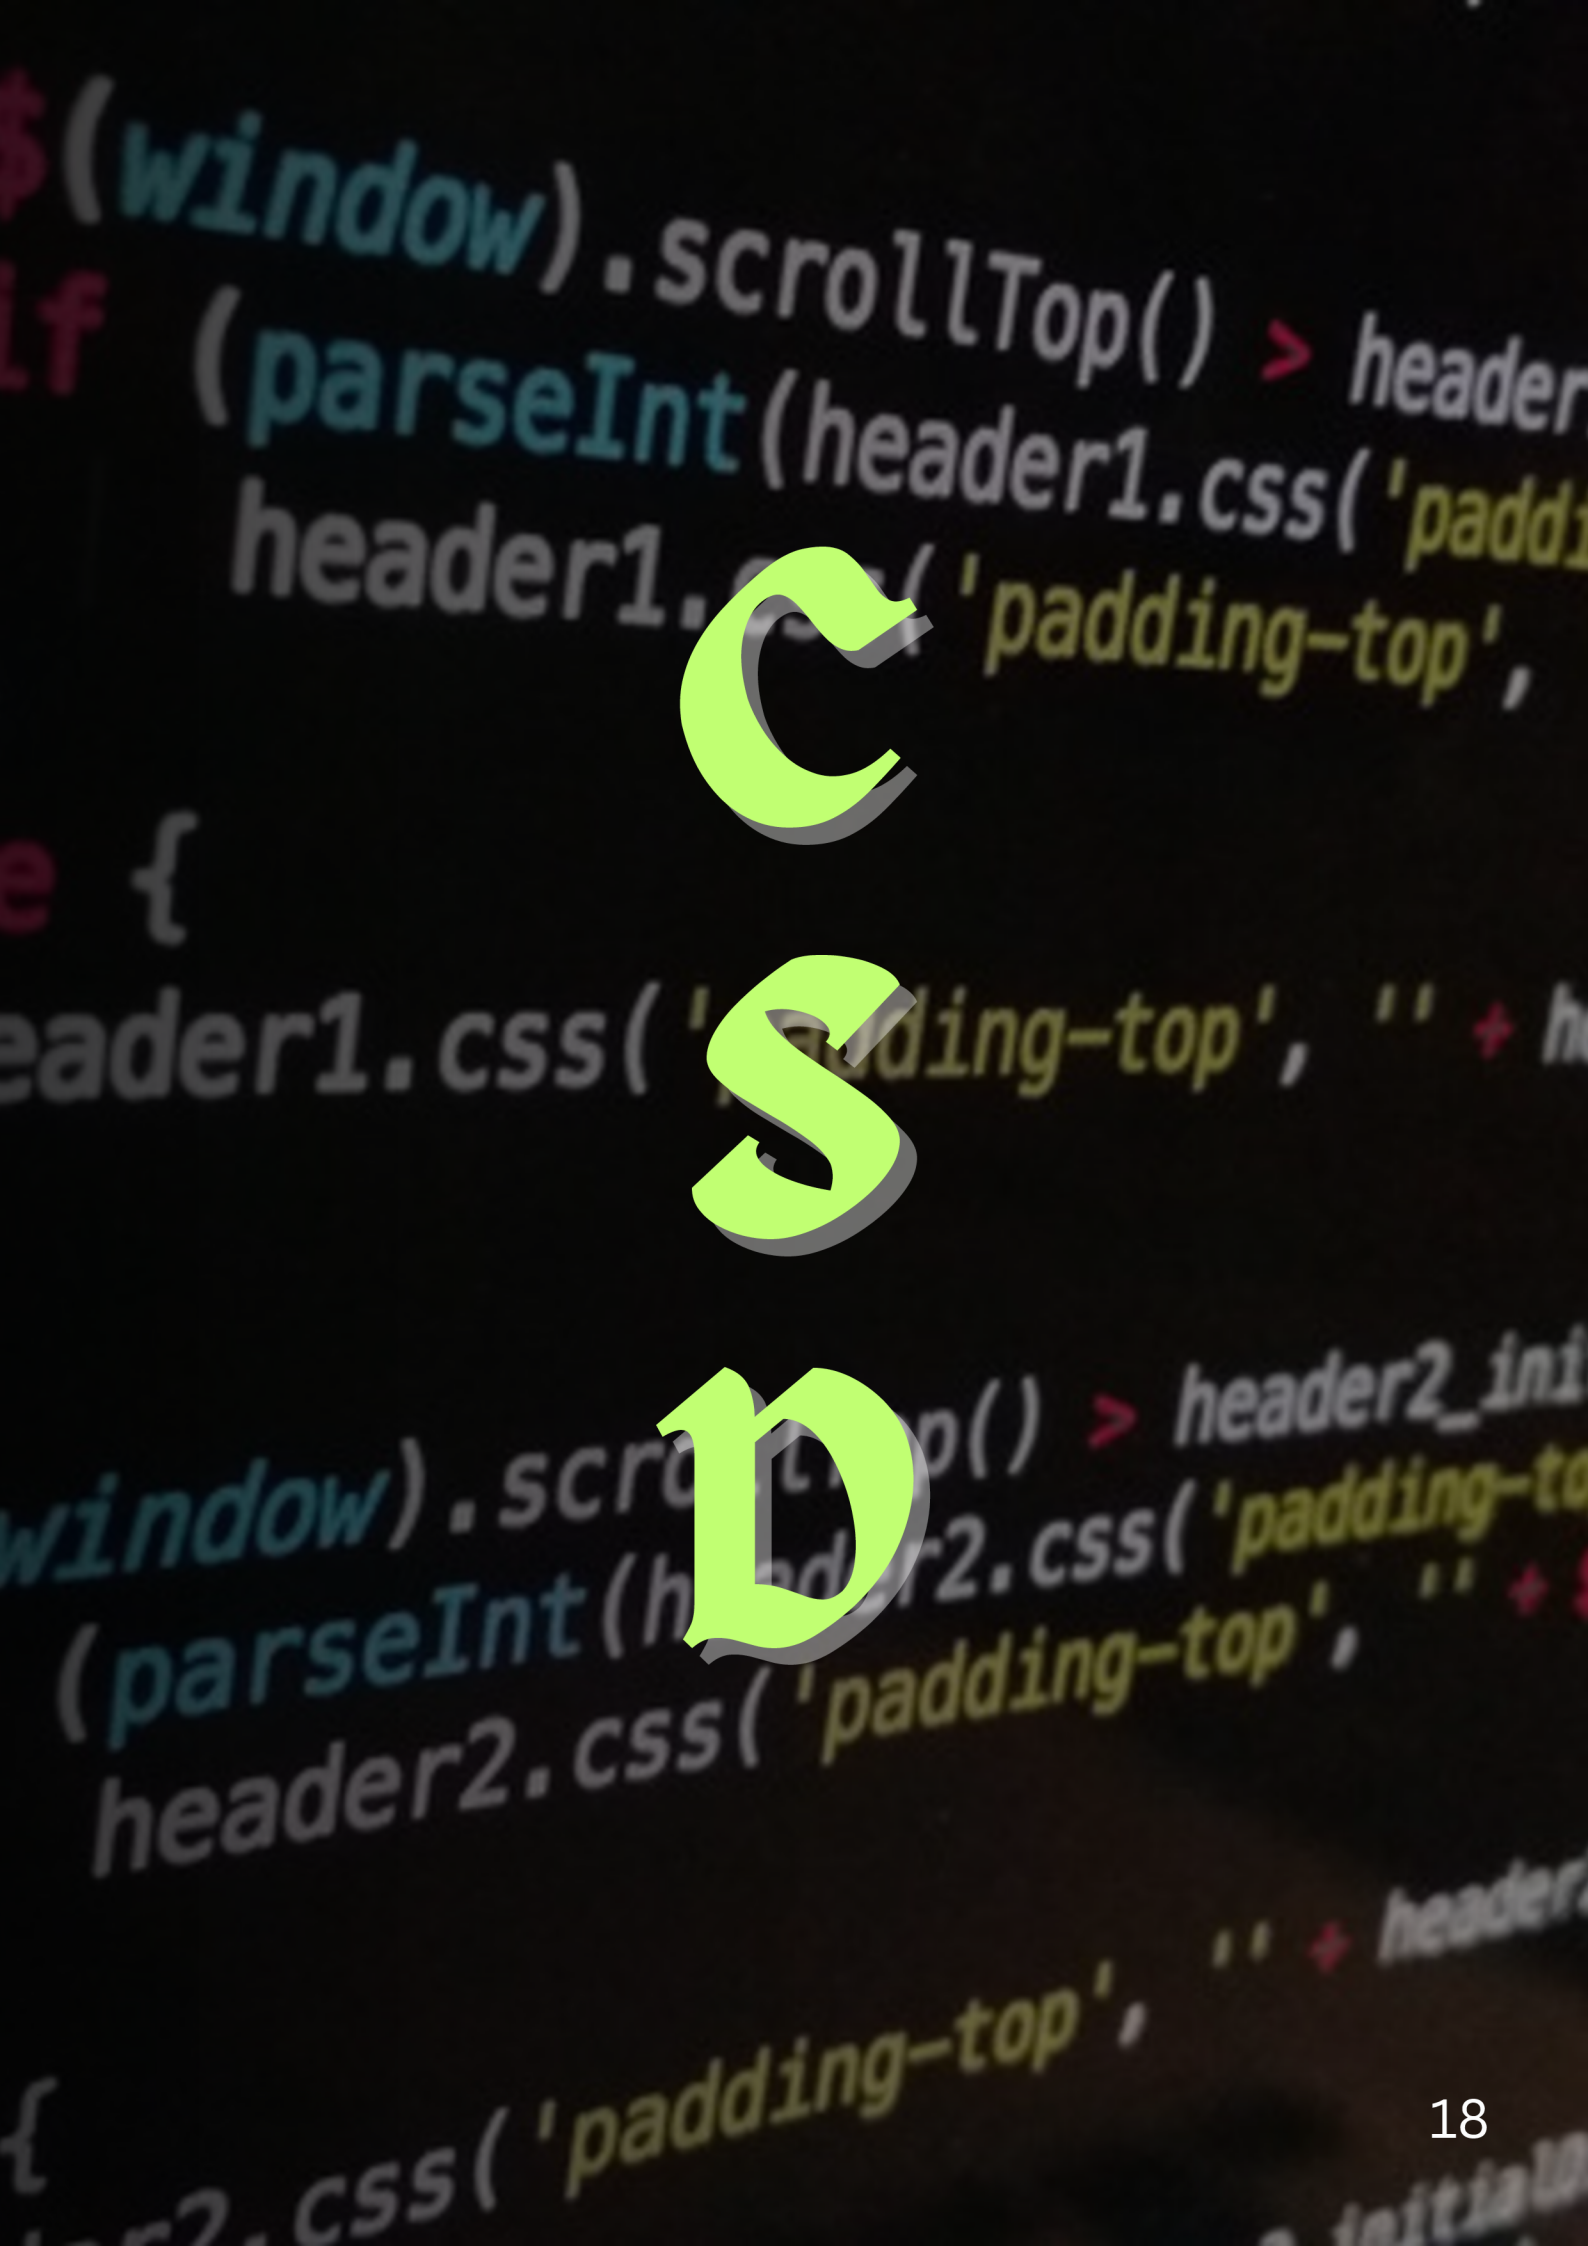

Module II: Mongo DB Operators, Commands, and Aggregation Pipeline

Module III: Creating and Dropping Databases & Collections

Module IV: CRUD operations, SQL to Mongo DB mapping, text search, common commands

Module V: Shell commands, cursor methods, database commands, replication, and connectivity with Java, PHP, and Python.

CSD

FDP

on RUST"

The Department of Computer Science and Engineering (Data Science) successfully conducted a one-week Faculty Development Program titled "RUST – Hands-On Learning" from June 23 to June 28, 2025, at MG 010, Hamsasana Computer Center. The FDP was aimed at equipping faculty members with in-depth knowledge and practical exposure to the Rust programming language.

Led by expert speaker Mr. Rajesh Kumar, the program provided participants with hands-on sessions and real-world coding examples in Rust, focusing on its applications in systems programming and performance-critical software development. The program fostered a strong foundation in modern programming practices, aligning academic expertise with current industry demands.

Session Highlights:

- **Hands-on training in Rust programming environment and toolchains**
- **Live demonstrations of systems programming concepts using Rust**
- **Introduction to memory safety and concurrency without data races**
- **Implementation of modules, traits, and ownership concepts**
- **Practical examples in file handling, error management, and multithreading**
- **Integration of Rust with external libraries and tools**
- **Interactive Q&A and feedback sessions to reinforce learning**

Mongo DB
FDP Program

The 3-day MongoDB Faculty Development Program (FDP) at MLRITM featured insightful afternoon sessions covering advanced MongoDB topics. Participants explored SQL to MongoDB translation, aiding the transition from relational to NoSQL databases. The sessions highlighted powerful text search capabilities for handling unstructured data efficiently. Techniques for performing partial updates using specific operators like $set were demonstrated, enabling efficient data modification. Additionally, methods for controlling query results through document limiting with limit() and skip() were discussed. These sessions provided participants with practical, hands-on experience, deepening their understanding of MongoDB's flexibility and effectiveness in modern data-driven applications and real-world implementation.

Hindustan Coca-Cola Beverages Pvt. Ltd. is one of India's largest FMCG manufacturing and distribution companies. HCCB manages the manufacture, packaging, sale, and distribution of Coca-Cola productsthrough a vast network of:

1.Distributors: Over 3,900 distributors ensure extensive market penetration.

2.Farmers: HCCB supports 250,000 farmers.

3.Suppliers: Over 7,000 suppliers contribute to its supply chain.

4.Retail Outlets: The products reach over 2 million retail outlets across India. HCCB operates in 25 states, covering 493 districts with 18 factories producing 55 products across 9 categories.

The students expressed their enthusiasm for learning about real-world applications "Wrapping up, we hope this article gave you useful insights —brought to you by Sridhar Aragontham, Shivani K, and Neha Verma. Thanks for reading!" for this informative session and looks forward to more such industry-academia interactions in the future.

MBA

FIVE DAYS SHORT TERM TRAINING PROGRAM

On 25th MAYto 29th MAY 2025, 50 students of 2ND YEAR MBA STUDENTS , Participated in a 5DAYS the program aimed The Five-Day Workshop – Short-Term Training Program on "E-Waste Management: Recycling Options for MSMEs" could focus on educating Micro, Small, and Medium Enterprises (MSMEs) on the importance of e-waste management and sustainable recycling practices. Here are some key points that could be covered in such a program: Understanding what qualifies as e-waste (old electronics like computers, mobile phones, televisions, etc.).helped them connect the theoretical principles with real-world applications in power transmission and communication systems.

Recycling Techniques: Overview of different methods for recycling e-waste (e.g., shredding, manual dismantling, chemical processing).
Innovative Solutions: Exploring new technologies and trends in e-waste recycling, such as the use of robotics or AI for sorting materials.

The STTP proved to be a valuable learning experience, broadening students' knowledge and skills in Discuss the environmental and health risks posed by improper disposal of electronic waste. Compliance for MSMEs: Practical insights on how MSMEs can adhere to these rules to avoid penalties and contribute to sustainable practices.

Revenue Generation: How MSMEs can profit from the recycling of e-waste, including reselling recovered materials like gold, copper, plastics, and other metals.
Creating New Business Models: Identifying business opportunities such as e-waste collection centers or refurbishing electronic products for resale.

TEACHERS DAY CELEBRATION

The MBA students, celebrated Teachers' Day on 05/09/2025 with great enthusiasm to honour the faculty members. The celebrations began with a warm welcome speech, followed by students expressing their gratitude through speeches, poems, and special presentations. As part of the event, students organized felicitation ceremony to the teachers’ efforts.

The celebration concluded with a vote of thanks, acknowledging the faculty's continuous support and mentorship. Teachers expressed their appreciation for the thoughtful gestures and encouragement from their students. environment in the MBA department.

MBA

MBA– ORIENTATION PROGRAM

On 22/05/2025, MBA Department organized the orientation program to MBA 1ST YEAR students. The program aimed to familiarize students with the academic curriculum, department facilities, and opportunities available for their professional growth. Faculty members and senior students warmly welcomed the new batch, setting the stage for an informative and engaging session.

Faculty members provided insights into the importance of core subjects, lab work, and emerging technologies in MBA. Senior students shared their experiences, offering valuable tips on time management, internships, and career planning. A special talk by an industry expert highlighted the latest trends in electronics and communication, inspiring students to explore innovative projects and research areas.

The orientation concluded with an interactive Q&A session where students clarified their doubts regarding academics, technical clubs, and placement opportunities. The program successfully provided a roadmap for the students, helping them transition smoothly into their second year. The department looks forward to guiding and supporting them in their academic journey and professional aspirations.

CLUB 64

Women Protection Cell – VAMA

CLUB 64

The summit was prominently graced by Shri Bhatti Vikramarka Mallu, the Deputy Chief Minister of Telangana, who served as the Chief Guest. Mallu emphasized the government's firm commitment to women's economic empowerment—highlighting ₹21,000 crore disbursed to self-help groups and support for women in solar energy ventures—underscoring the event's theme of "Accelerate Action for Women Empowerment". Also delivering significant insights was C. V. Anand, IPS, the Hyderabad Police Commissioner and Chairperson of the Hyderabad City Security Council, who articulated the meaning behind the acronym STREE—"She Triumphs Through Respect, Equality and Empowerment." He drew attention to critical issues like the declining girl-child ratio (942 per 1,000) and the notable increase in female representation within the police force, including seven women-only police stations, eight women DCPs, and three women SHOs. Dr. Banusri Velpandian from NITI Aayog was yet another distinguished guest, delivering the keynote address and illuminating various strategic initiatives spearheaded by the think tank for advancing women's empowermen

REPORT ON BREAST CANCER AWARENESS PROGRAM

The primary objective of the Breast Cancer Awareness Program was to educate and sensitize the women faculty and girl students about breast health, importance of early detection, self-examination techniques, and to dispel myths surrounding breast cancer. The event aimed at encouraging proactive health practices among women and promote empowerment through awareness.

The program was conducted in collaboration with Sri Jhansi.M, a mobile cancer screening and awareness initiative led by Dr. Pragnya Chigurupati. The initiative has been actively working towards making cancer detection accessible, especially for underprivileged communities, while also advocating for women's health education and lifestyle awareness.

The program witnessed an enthusiastic participation from over 300 women, including girl students and female faculty members across various departments. The high turnout indicated the deep interest and need for such awareness sessions within the academic community.

A page from my life

Mahender Reddy Kotha.
III B.Tech, CSD

My Journey as a Student-Entreprenuer: Striving to Stand on My Own

Back in 2020, I was just a 10th-grade student with no big plans on paper, only a strong thought in my mind: I don't want to wait to grow up to do something big. I want to start now.

While most of my friends were busy discussing games, movies, or the next exam, I ventured into the unknown world of business. I had no experience and no mentor in the industry. It was just me, my determination, and my belief that I could make it happen.

My first strides....

I began my career as a salesperson in network marketing. It was not glamorous; I knocked on doors, made calls, and heard "no" more times than I could count. But every "no" made me stronger. In just 3 to 4 months, I earned ₹20,000—my first taste of success. I didn't blow it on luxuries. Instead, I bought a camera on EMI, turning that money into a tool for my next project: renting it out and doing photoshoots.
I still remember traveling in the hot sun, carrying my camera bag, and reaching locations on time even when my friends were relaxing at home. I missed outings; I missed fun, but I never missed an opportunity to work.

A leap of faith....

Then came my biggest leap—starting a poultry farm with Suguna integration. Everyone around me thought I was crazy. "You're too young for this; you'll fail." I smiled and kept going. My attendance dropped, my diploma backlogs grew, but I didn't stop. There were days I ate once a day because I was too busy managing the farm.

When my first batch succeeded and I earned ₹1 lakh in profit, I didn't celebrate by spending it all. I paid off my debts. That was the day I realized—business isn't just about money; it's about discipline, patience, and vision. Trust me, there is nothing "easy", I was not just the owner-I was the worker, "Every drop of sweat was building my dreams".

From one poultry farm, I expanded to three. I learned to make decisions quickly, take smart risks, and handle pressure without breaking. With my profits, I invested in Kisan Parivar, started my journey as an investor. Slowly, I get to understand startups, business models, and how money works for you when you work smart.

My journey as an entrepreneur continues...

Today, I am 20 years old, financially free, and have a net worth of ₹20 lakhs. But my true wealth? The sleepless nights that taught me focus. The failures that taught me patience. And the fact that I can look in the mirror and say, "You started with nothing, and you made it happen."
To every student reading this—I'm not special. I wasn't born rich, I didn't have connections, and I had no magic shortcut. The only difference? I started. I fell, I stood back up, and I kept moving.
If you have a dream, don't wait for the "perfect time." There is no perfect time. Start now, start small, start scared—but start.

Because one day, your story could inspire someone else to take their first step.

Yasaswini
II yr. B. Tech–CSD.

COVID Changed Me 180°

My name is Yasaswi, and I am currently pursuing my B.Tech in Data Science from MLRITM.

Growing up, I was not good at academics. I was immature and stubborn. I was often left out and body-shamed. It stayed that way for a long time, and I didn't even realize that I was going through something difficult at that age.

But everything changed during the pandemic in 2021. Like all students, I stayed at home. During that time, I started interacting more with my parents and had long conversations with them. That's when I came to understand our financial situation and the stress I was unknowingly causing them. From that moment, I decided to change myself in everything in studies and looks etc.

I began focusing on my studies with the help of my mom, who is a teacher. It was hard in the beginning, but I didn't give up. I kept learning consistently and slowly became more confident. Over time, I became a student who could read, understand, and perform well in academics.

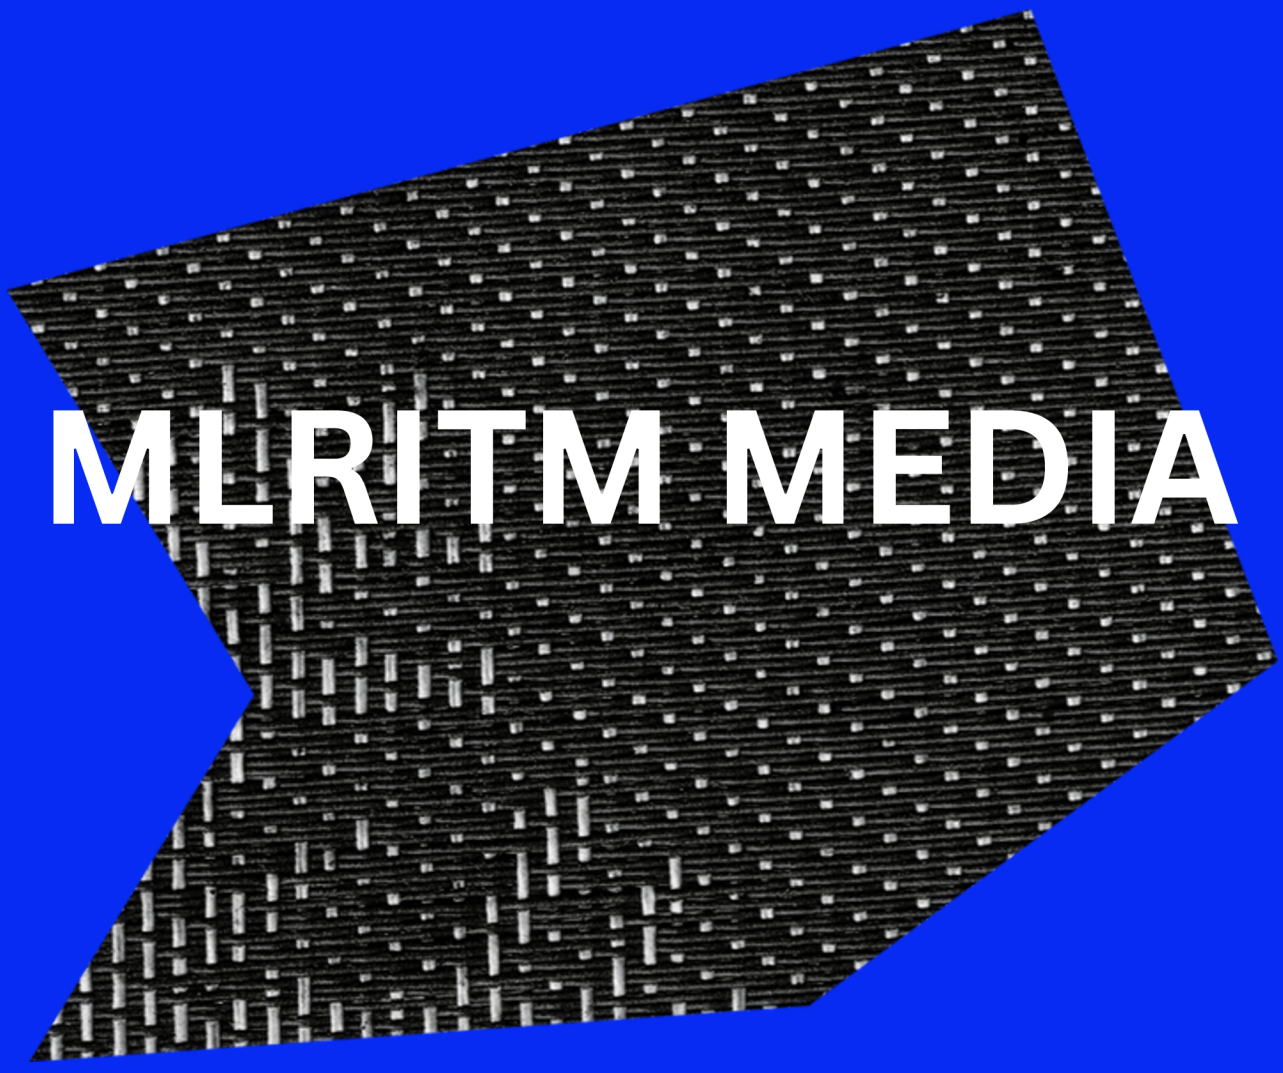

When it came to my looks, I faced many moments that made me feel bad about myself. After schools reopened, I returned — and things were different. Before COVID, I was mostly ignored. But now, people started talking to me and appreciating my efforts and improvements in studies. That motivated me to continue working harder.

During my Intermediate, I had a dream of getting a good rank in IIT. But I couldn't achieve it because my basics were weak, and maybe my caste was also a factor. Still, I gave my best and tried to get a good rank in EAMCET. I ended up with an average rank but managed to get a free seat at MLRITM.

In the first year of my B.Tech, I started learning programming with C language. My father, who has an IT background, always encouraged me to learn programming languages and i started with C then continued with Java, DSA, and practice coding regularly — especially during my second year and development my logical thinking.

When I entered my third year, our college divided students into two groups: PAT and Non-PAT, for placement training. But my path was different. Even though my branch was Data Science which is the same as my goal, I realized that placements for my field were limited on campus. So, I chose the Non-PAT path, stopped preparing for campus placement companies, and decided to focus on learning Data Science on my own.
Now, my goal is to get a job outside the campus especially in a big product-based company.
